

STA-KOOL®

ADVANCED ELASTOMERIC COATINGS

Since the 1960's, Sta-Kool Roof Coatings have been known for high quality reflective coatings. Roofers, painters and architects made Sta-Kool their first choice for their reflective roof coating needs. In 1994, the Sta-Kool line was redesigned to appeal to all markets, instead of the professional trade only. Then in 1998, it became obvious that the elastomeric coatings were driving the brand, and the line was dedicated to Advanced Elastomeric Coatings.

Sta-Kool formulations incorporate styrenated-acrylic formulations which are far superior in water resistance and weathering.

By focusing on Elastomeric Coatings, we filled a void in the market and have seen significant increases in market share. Sta-Kool is now synonymous with Advanced Elastomeric Coatings and has specialized in this category.

Sta-Kool's Elastomeric formulations use the latest technological advancements in the industry today. While some manufacturers still use basic acrylic formulations developed in the 1960's, Sta-Kool's products incorporate state of the art polymer technology.

Sta-Kool products incorporate styrenated-acrylic formulations which are far superior in water resistance and weathering. Elasticity, recovery, high and low temperature flexibility are all dramatically improved with this newer technology. Our use of grade A+ titanium (TiO₂) which is imported from all over the world, gives the brightest white finish, and provides the most consistent quality. Batches are made with a state of

the art "Supercharged Disperser" which produce a finished product of superior consistency and excellent spray ability. These are just some of the reasons why the Sta-Kool products have been such a great success.

Thank you for making the Sta-Kool products the fastest growing line of Elastomeric Coatings in the world!

STA-KOOL®

MEETS PERFORMANCE STANDARDS OF:

www.energystar.gov

www.coolroofs.org

When installed properly, this product can help reduce energy costs. Actual savings will vary based on geographic location and individual building characteristics. Consult your product manufacturer, roofing contractor, or call EPA's ENERGY STAR® hotline at 1-888-STAR-YES (1-888-782-7937) for more information.

780 & 770 White Roof Coatings comply with the stringent requirements of the CRRC's Reflectance & Emittance Standards. Both qualify to be approved coatings, eligible for the toughest specifications of California Title 24 and other industry leading standards.

ADVANCED ELASTOMERIC COATINGS

780 10 Year Ultra White Siliconized Elastomeric Roof Coating

Sta-Kool #780 Ultra White Siliconized Elastomeric Roof Coating is the coolest and highest-performing white roof coating available; we guarantee it! This product forms a thick, rubber shield that is modified with silicone resins to provide unbeatable waterproofing protection and adhesion. Sta-Kool #780 also reflects the sun's heat and destructive UV rays to drastically reduce roof temperatures. This results in a reduction of interior temperatures and cooling costs. This product is an "investment" which can actually pay for itself in savings on cooling costs.

ITEM#	SIZE	PACK	UPC#
SK-7801	1 Gallon	4 per crtn.	025056780164
SK-7805	5 Gallon	27 per plt.	025056780560

Performance Rating System	Rating (Scale of 1 - 10)
95% Initial Reflectance	10
10-15 Year Life Expectancy	10
Ponding Water Resistance	6
Flexibility	10
Heat Transfer Reduction	8
Potential Energy Savings*	8
*On Cooling Costs 35%	
Overall Performance Rating =	9

770 7 Year Ultra White Elastomeric Roof Coating

Sta-Kool #770 Ultra White Elastomeric Roof Coating is a tough, highly flexible, rubberized roof coating. This high-performance, 7-year warranted product resists cracking and peeling. The coating also provides a highly protective barrier which reflects the sun's heat and destructive UV rays. This helps to cool roof surfaces and reduce interior temperatures. This product is an "investment", which can actually pay for itself in savings on cooling costs.

ITEM#	SIZE	PACK	UPC#
SK-7701	1 Gallon	4 per crtn.	025056770165
SK-7705	5 Gallon	27 per plt.	025056770561

Performance Rating System	Rating (Scale of 1 - 10)
90% Initial Reflectance	9
7-10 Year Life Expectancy	8
Ponding Water Resistance	4
Flexibility	9
Heat Transfer Reduction	8
Potential Energy Savings*	7
*On Cooling Costs 30%	
Overall Performance Rating =	8

390 7 Year White Elastomeric Roof Patch

Sta-Kool #390 White Elastomeric Roof Patch is an extra tough, 7-year warranted, liquid rubber repair compound designed to patch splits, cracks and holes up to 1" in most roof surfaces. This water-based product dries quickly to a non-tacky finish and is easy to use and clean up.
